

Professor Loken

ENGR 101 Introduction to Engineering – Engineering in aerospace systems! Taught by Professor Loken, an Electrical Engineer from Hurlburt Field, retired as a Lieutenant Colonel from his 20 year Air Force career. Professor Loken has a Master of Science degree in Engineering and Environmental Management from Air Force Institute of Technology. Mr. Loken had assignments in Italy, Virginia, Mississippi, Hawaii and finally Florida. He was in the Air Force where he was the Chief of Maintenance Engineering.

Professor Donald

UAS and Introduction to Aerospace Classes-Indians!! As you can see from my picture, I have spent a fantastic career in aviation. The baby pictured to the right is a Cessna CJ-3 (CE-525B), all glass cockpit, and can climb to 45,000 feet in 20 minutes, fully loaded. That was an awesome job flying all over the U.S., Canada, Mexico, Bermuda, Bahamas, and the Caribbean. This was just one of many awesome jobs I have enjoyed. For me, it all started right here at Eglin AFB as an USAF education specialist. I completed a bachelor's degree in Psychology and was selected for USAF Officer Training School and Undergraduate Pilot Training. After that, the entire world opened up to me with assignments in Guam, Germany, California, Virginia, Louisiana, Mississippi, and Texas. For over 30 years, I flew trainers, bombers, reconnaissance, surveillance, and transport aircraft, including the unmanned MQ-1B Predator (UAS). During this journey, I received a master's degree in aeronautical science from ERAU-W.

But, the fun has not stopped there! In 2014, I began teaching for Okaloosa Aerospace Academy as an adjunct assistant professor from ERAU-W. Many of you have taken my classes that include Intro to Aeronautics, Intro to UAS, Private Pilot Operations, and Safety. I truly look forward to many more of you young minds taking aviation courses, and pursuing your dreams. I would really like to be a part of that adventure.

I enjoy a nice little beach home with my wife, Jeri, and my Yorkie, Rosie in Blue Mountain Beach on 30A. I love to cook and bake (went to Culinary school in 2015), watch college football, golf, and fish on Grayton Beach.
