Help Prevent the Spread of NOROVIRUS A STOMACH BUG
Stop norovirus! Clean surfaces that are touched a lot.

1 CLEAN UP SURFACES
- Wipe down surfaces with a disinfectant.
- Discard used towels.
- Clean surfaces with soap and water.

2 DISINFECT SURFACES
- Mix 3/4 cup chlorine bleach with 1 gallon of water.
- Apply the solution to surfaces for 5 minutes.

3 WASH YOUR HANDS
- Wash hands with soap and water for 20 seconds.

Norovirus spreads by contact with an infected person or by touching a contaminated surface or eating contaminated food or drinking contaminated water.

Scientific experts from the U.S. Centers for Disease Control and Prevention (CDC) helped to develop this poster. For more information on norovirus prevention, please see http://www.cdc.gov/norovirus/preventing-infection.html.
