Subject Match:

User certificate:

Identity:

Password: 👁

Anonymous identity:

Save identity and password

Share this network with other users

6. Select Connect
7. The Chromebook should connect to BYOD and allow you to login using your personal credentials.

8. Once logged in, Open your web browser and go to:

<https://www.okaloosaschools.com/depts/tech/internet-access>

Click the Firewall Certificate Download link

This should download a certificate on your Chromebook

9. Now, in the browser type **chrome://settings/certificates in the address bar**
10. The Certificate Manager page should open, got to the "Authorities" Tab and click "Import"
11. Select the downloaded certificate in the downloads folder and click "Open"
12. Check the option "Trust this certificate for identifying websites" and click "OK"
13. Your Chromebook should be able to access the internet at this point.
