

For Elementary Students/Parents

What ESOL supports are included in Odysseyware/Spark courses?

The Odysseyware/Spark online platform offers support for English Language Learners through multiple features including:

- **Translation** – A translate tool is provided to translate assignment text (see screenshot below).
- **Text-to-Speech** – Students may have assignments read aloud by selecting the text-to-speech tool.
- **Vocabulary Practice** – Students may practice academic vocabulary by selecting the Vocabulary Arcade icon at the bottom of the assignment page.

Odysseyware incorporates instructional videos, interactive learning games, rich illustrations and animations to support the English Language Learner's needs to build language acquisition.

For more information, please see the Odysseyware Student User Guide:

Odysseyware

Translate assignment text into a different language

Note: Translated text is limited to 1000 characters at a time. If you highlight more than 1000 characters, a message appears stating that your request has been restricted to the first 1000 characters. For some languages to translate correctly, your computer's browser must have the fonts installed to support the translated text. For example, for Burmese, depending on your browser, you may need to download and install the Zawgyi-One Burmese Unicode font. The speaker with sound waves symbol may appear a bit different depending on the installed fonts and browser.

OPEN ASSIGNMENT

HIGHLIGHT

TRANSLATE

1. Open an assignment and highlight the text, up to 1,000 characters, that you want to translate.
2. Click the **Translate**  tool to open the language list. Scroll the list to select a language.
