What's new in this release of Odysseyware® v2.44

Odysseyware v2.44 contains several improvements:

Home page now displays much faster because the Assignment Alerts list only shows the last seven (7) days of alerts (up to 100 total). To support the change on the Home page, additional filtering was added to the Assignment Alerts tab.

Viewing and taking action on Assignment Alerts are just a few of the tasks performed on a daily basis by Teachers. Because the Home page is the first page that Teachers (and Admins) see when logging in to Odysseyware, this improvement allows the Home page to display much faster so that Teachers can quickly see the alerts to be addressed. Changing the number of assignment alerts to the last seven days means Teachers see the latest updates. Teachers can sort most of the columns and use the paging controls at the bottom to quickly find a student, assignment, or activity status, such as Overdue assignments.

To see alerts past the last seven days, Teachers can click the Assignment Alerts link at the top of the list and go directly to the Assignment Alerts tab. The Show Progress for filter now has additional time selections for displaying alerts. Teachers can see alerts for the past two days all the way back to the past 30 days.
Archive grace period for users and enrollments was increased from 300 days to 365 days so that a full year span is available.

This was a much-requested feature improvement. Schools wanted to have up to a full year span (365 days) grace period so that user records and enrollments in pending_archive status were not automatically archived until the full year had passed. While in pending_archived status, during the set grace period, user records and enrollments can easily be retrieved for reporting purposes and status can be changed to active or on hold, if necessary. The School Settings > Archive tab is available to Admin users only.
OASIS API v14 was released with a new batch endpoint and an improvement to an existing batch endpoint

For Integrators helping schools use the OASIS RESTful API to externally manage user profiles and enrollments and other data:

- A new batch endpoint was released so that Assessment Identifiers could be added to, updated, or removed from student profiles. Assessment Identifiers reference students who have taken external assessments and provide the “link” between those external assessments and Odysseyware.

- An improvement to the batch Teacher Permissions endpoint now allows Integrators to set the “super_teacher” role while setting teacher permissions.

For more information, see the OASIS API v14 Tech Guide.
Introduction

Welcome to the Odysseyware® Teachers Quick Start Guide.

This guide is meant to help you quickly get school started by setting up users and enrolling students in courses. For more detailed instruction and information, see the Teacher User Guide. To access a copy of the guide or any other resources, do one of the following:

- Click the Help link located at the bottom of any Odysseyware page to access the Help and Technical Support page. Then, click the Browse resources button under the Browse the Training Support Site section.

This action opens the Odysseyware training resources Knowledgebase page where you can use Search or click a navigation link to access helpful resources, such as Quick Start Guides, User Guides, course resources, video tutorials, and more.

Or,

- Go directly to the Odysseyware Training Resources Knowledgebase page at: https://www.odysseyware.com/training-resources. The Knowledgebase page has a Search feature where you type a keyword to access resources containing that keyword. Or, use the navigational links to access user guides, videos, and other helpful resources related to the selected link.

Log in to Odysseyware

How you log in depends on whether or not your school has enabled Single Sign-On (SSO) functionality with Odysseyware:

- For schools without enabled SSO functionality, on the Login page, enter your Username and Password and then click the Ready, Set, Learn button.

- For schools with enabled SSO functionality, on the Login page, click the Sign In With [Azure][Google][Other IDP] button. Enter your Identity Provider (IDP) credentials and click Sign In, or if you are already in your school's IDP session, you are immediately signed in to Odysseyware.

View important information on your Home page

By default, Odysseyware opens to the Home page. The Home page has several tabs and boxes containing lists of important information and items needing your attention.
### Add (register) students

You can add (register) an individual student or multiple students. To add multiple students, see "Import (register) multiple students" on the facing page.

**Permission(s) check:** You must have the "Add Students" permission to add students to Odysseyware. See your Odysseyware Administrator if you require the permission enabled for your teacher profile.

#### Add an individual student

1. On the main nav bar, click Students.
2. On the Registration tab, click Create student.
The Create Student page appears.

3. Complete the user identification fields, permissions settings, and enrollment grading, pacing, and weights settings shown on the page. Remember - permissions and enrollment grading, pacing, and weights settings may be dependent on the school permissions and school grading, pacing, and weights settings. For more information, see the Teacher User Guide.

4. When finished, click Save.

The new student user appears in the list on the Registration tab.

Import (register) multiple students

1. On the main nav bar, click Students.
2. On the Registration tab, click Import Students.
   
   a. Click Download Template.

   **Note:** For schools with enabled Single Sign-On (SSO) functionality, the template contains the fields needed to create/register students and use SSO. You need the students’ organization Login usernames from your Identity Provider (IDP). For example, your school uses Google accounts to sign on to various web applications using a single username and password. The required columns are: First Name, Last Name, and SSO ID. The SSO ID is the student’s SSO Login username. Two columns, Student ID and Campus ID are optional.

   b. Enter required data in template and save as .csv file. For the Campus ID column, you can enter multiple campus identifiers for a student by using the pipe ( | ) symbol to separate values.

   **Warning:** Campus identifiers MUST match identifiers already set up by the Admin. During import, if campus ids do not match, an error message appears.

   c. On Import Student page, click Browse and locate the .csv file.
   d. Click Next.

   The Preview and Edit page appears.

3. If duplicate usernames are detected (for schools without enabled SSO functionality), click the duplicate Username and enter a new username, and then click in any other field to verify the new username.

   **Note:** For schools with enabled SSO functionality, student usernames are generated by the system based on the SSO ID entered in the template for students.

4. Make changes as necessary to the permissions, enrollment settings, and school term. Any changes to settings apply to all imported students, but you can modify individual settings later. If desired, you can change or add data to any field in the student list. Click a field, and in the text box, enter the data. Or, to add or remove a campus id, click in the Campus IDs cell for the student and from the list, select a campus id or clear the check box to remove the campus id.

5. To import the students, click the check box in the first column next to each student, or to select all students, click the check box at top of first column.

6. Click Submit. Click Done.
Create student groups

You can create groups of students so that you can easily enroll the group members at the same time and also write and send messages to group members simply by selecting the group. You can also search for student groups in the Gradebook and run group reports. You can add Active or On Hold students (that you can access) to groups.

**Permission(s) check:** You must have the "Manage Student Groups" permission to add and manage student groups in Odysseyware. See your Odysseyware Administrator if you require the permission enabled for your Teacher profile.

1. On the main nav bar, click **Students**.
2. Click the **Groups** tab to open it, and then click the **+New Group** button.
   The **New Group** page appears. Your name as the group owner is displayed in the **Group Owner** field.

   **Tip:** You can transfer the ownership of groups you created to another teacher. After the group is created, select it, and then from the **Actions** list, select **Change Owner** and click **Apply**. Search for the new owner and click **Save**.

3. Under **Group Details**, in the **Name** field, enter a unique group name. The name must be unique for your school (capitalization does not make it unique) and contain three (3) characters, but not more than 31 characters.

4. (Optional) In the **Description** field, enter a short description to help you identify the group. The description can contain between three (3) and 255 characters.

5. To search for and select students to include in the group, do the following:
   a. In the **Search Students** field, enter three characters of a student's first or last name, username, Student ID or Campus ID. Your ability to search students depends on the students you have access to see. A list of accessible students that match the characters you entered appears. Or, to see the list of all students that you can access, type one character and then press Backspace to remove the character.
   b. From the search results list, to select one or more students, click the check box next to the student's first name. To select all the students, click the check box at the top of the column next to the **First Name** column. If the search results are large, use the paging controls at the bottom of the list to view and select students.
   c. Click **Add to group** or under **Actions**, click the **Add Student** tool for each student.
      Selected students are removed from the search results and now appear in the **Students in the group** list.

6. If desired, to remove a student from the **Students in the group** list, click the check box to select the student. Then, click **Remove from group**, or under **Actions**, click the **Remove Student** tool.

7. When finished, click **Save**.

Enroll students in courses

**Permission(s) check:** Teachers and Supers Teachers with the "Assign Courses" permission can create enrollments for students they have access to see. For more information, see the **Teacher User Guide**.
You can enroll one or more students in one or more courses at the same time. Consider the following before you begin enrolling multiple students in multiple courses at the same time:

- Students in the enrollment with individual, personalized Grading, Pacing, and Weights settings for their student profile will keep those personalized settings for the enrollment and those students in the enrollment without individual, personalized Grading, Pacing, and Weights settings will use the default school-level Grading, Pacing, and Weights settings. If you, as the enrollment creator and logged-in user, have the "Change Grading, Pacing, and Assessments" permission, you can modify (personalize) the enrollment settings for the entire enrollment. For more information about Grading, Pacing, and Weights settings personalization, see the Teacher User Guide.

- You select one teacher of record (TOR) and one term for the entire enrollment.

**Tip:** There are several ways to enroll students in courses. One of the easiest ways is to enroll a group of students (see "Create student groups" on the previous page) using the Add Enrollment button on the Gradebook.

1. On the main nav bar, click Gradebook.
2. By default, the Grading tab is active, so click the +Add Enrollment button.
   The Enroll Students page appears.
3. Under Enroll Your Students, in the Add Student / Group field, start typing the group's name or a student's name, username, student ID, or campus ID. When matching names appear, select the group or student. If desired, continue searching and adding students to the enrollment.
4. To search for and select course(s) for the enrollment, in the Add Courses field, start typing the course or subject name. When matching courses appear, select the course. If desired, continue searching and adding courses to the enrollment. Remember - all courses must use the same term, and teacher. However, each course can have its semester, status, and CRx mode settings modified as described in the next step.
5. If desired, and if the course allows it, do the following:
   a. Select a course length (example A) of Full semester (Full), First semester (Sem 1), or Second semester (Sem 2). If the course length cannot be changed, the options are disabled.
   b. Click OFF to change status from Active to On Hold (example B).
   c. Click OFF to turn ON CRx mode (example C). If CRx mode cannot be changed for the selected course, the option is disabled.
6. In the **Teacher** field, the name of the logged-in user appears by default. To assign the enrollment to another teacher (or admin), clear the field and start typing the person's name. Select the teacher/admin from the matching list.

7. In the **Terms** field, keep the default term or click to select another school term. If desired, click **Custom Term** and enter custom term start and end dates.

8. If desired, to view the enrollment grading and pacing, weights, monitored assessments settings and other permissions, click the **View and edit settings** tool located in the upper-right corner of the page. If you make changes, click **Save Settings**. Otherwise, click **Cancel**.

   **Tip:** If you plan to do consecutive student enrollments, as a time-saving feature, select the Create Another Enrollment check box located below the Create Enrollment button at the bottom of the page. This action keeps your selected students, teacher, term, and courses in the Enroll Students page so that you only have minimal changes to make after submitting the first enrollment. If you switch to another Odysseyware tab or page between consecutive enrollments, your settings are not saved.

9. When finished, click the **Create Enrollment** button.

10. At the enrollment submitted successfully message, click **OK**.

   **Note:** When the enrollment is processed by Odysseyware, as the enrollment creator, you receive a "Batch Enrollment Result" message in your Messages Inbox that notifies you of successful and failed enrollments. If an enrollment failed, the message explains why. Be sure to check your messages. The Teacher assigned to the enrollment also receives the "Batch Enrollment Result" message in their Messages Inbox. See "Communicate with teachers and students using internal messaging" on page 16.

---

**View assignment alerts to take action on student progress**

You use the **Assignment Alerts** tab to view the timely progress status of current assignments (back to the past 30 days) for your students or for all students. You immediately see if an assignment is overdue, blocked/failed, graded, or has been re-assigned. You can take action on an assignment and view the contents of an assignment.
1. On the main nav bar, click **Assignment Alerts**.

2. You can:
   - Filter and sort the list to change the information displayed. For example, to see alerts for the past 14 days, from the **Show Progress for** list, select **past 14 days**.

   ![Assignment Alerts](image)

   - Change status of assignments. Select a status from the **Status** list.
   - Manually enter a grade for assignments. Select a status of **Graded** and then in the **Update Score** page, enter a score. Click **Save**.
   - Click an assignment title to view contents of and manage assignments in the Teacher Assignment view. You can see questions, student's answers, lesson content and more.

**View and take action on students' progress in assigned courses**

Once students are enrolled in courses, you can view their progress for an assigned course in the **Gradebook**. You can drill into the units and individual assignments in assigned courses to see the detailed progress information and take action, such as unblocking a quiz. There are several ways to access the **Gradebook** for a student, but one of the easiest ways is from the **Students > Registration** tab using the **Go To > Gradebook** shortcut.

1. On the main nav bar, click **Students**.

2. On the **Registration** tab, use the filters to find the student. Then, under **Controls**, click the **Go To > Gradebook** shortcut link for the student.

3. To drill into the course to see progress by unit, click the **expand** symbol in the first column next to the **Course Name**. The symbol changes to the **collapse** symbol.

   At this level, information shown includes unit number, title, start date, unit complete date, progress, and composite score. If the unit was skipped, a check box appears in the Skipped column. To skip a unit, select the check box. To unskip a unit, clear the check box.

4. To drill deeper into the unit's assignments, click the **expand** symbol in the first column next to the **Unit Title**. The symbol changes to the **collapse** symbol.

   At this level, you now see the individual assignment type – lessons, projects, quizzes, tests, and references – that make up the unit. You see the status, due date, started date, completed date, number of attempts, and score (if completed).
If the assignment is a Lesson or Project and it has a light blue background color, and the pointer changes to the Hand icon when you hover over the assignment symbol, this means the assignment has aligned standards that you can view as shown in this example.

![Assignment with Hand Icon]

5. To collapse the units and course, click the collapse symbol at either the unit's level or course level.

Monitor and share student progress with the Dashboard

For schools with active student enrollments, the Dashboard tab is the default tab for Reports. The Dashboard tab has two views - the main view and a student details view. The information shown and tools available differ between the views.

**Note:** For more information about the Dashboard features and tools, see the Dashboard User Guide or the Teacher User Guide.

- Use the interactive graphs to visually see where all students are in assignment completion and current score. Click a graph bar (or color) to filter the data shown.
- Quickly identify students who have overdue assignments or are scoring low so that discussions and possible intervention can begin.
- Export data to .csv or .pdf formats to analyze and share with others.
- See a student's current score, relative score, score by assignment type, the amount of time spent working on assignments, and course progress for an individual course on the Students Details view.
- Quickly navigate to the student's enrollment in the Gradebook (without leaving the Dashboard) to view and manage individual assignments.

Run student activity reports

Odysseyware has a variety of reports available to report on student progress and track student activity.

Two access points are available to run reports from:

- The main nav bar Reports > Activity Reports sub-tab where you can apply filters to the data.
- The Quick Reports tool from the Gradebook where several student reports based on the course enrollment term are available.

For either access point, you can select to export the report as a Web (HTML) page, CSV file, or a PDF.
Run reports focused on aligned standards

Note: Depending on the report export format, some reports generate as separate reports with many pages.

1. On the main nav bar, click Reports, then click the Activity Reports sub-tab.
2. If desired, to change the time zone for the report, select a different time zone.
3. From the reports list on the left, select a report.
   This action displays the applicable report filters, such as Select Time-frame, Select Users, Select Group, Select Campus ID, and Select Enrollments, which determine the information to include in the selected report.
4. Select filters as required by the report:
   a. If the report requires a time frame, for the Select Time-frame filter, select a one or more school terms or enter custom start and end dates.
   b. If the report requires user information, for the Select Users filter, as a quick search, use the Name search field to locate a user. Or, just select users from the list that appears. Click the check box next to the name to include the user in the report.
   c. If the report requires group information, for the Select Group filter, select one or more student groups.
   d. If the report requires campus information, for the Select Campus filter, select one or more campus ids.
   e. If the report requires enrollment information, for the Select Enrollments filter, click the Show/Refresh button to display all courses for the selected users. Then, use the Course, Edition, Student, Teacher, Status, or Reason filters to easily locate course enrollments. Select the check box for each enrollment to include in the report.
5. From the Export as section (at the top or bottom of the filters area), select a report format.
6. Based on your selected report format, you can open the file immediately, save it, or print it.

Run reports focused on aligned standards

You can run reports focused on standards alignments for your entitled courses or across all content. The Reports >Curriculum Reports sub-tab allows you to select the state and/or national standard (based on your entitled states’ standards and national standards documents) first, then each remaining selection activates the next selection category of data for the report.

Permission(s) check: An Odysseyware License Administrator must enable permission for a school to have access to Curriculum Reports. If permission is disabled, Curriculum Reports are not available.

1. On the main nav bar, click Reports, then click the Curriculum Reports sub-tab.
2. From the list, select a report.
3. From the Select Document list, select the state or national standard.
4. From the Select Subject list, select the curriculum subject.
5. Select a grade or discipline. Then, depending on your report selection, from the Select Course list, select a course.
6. Click Run Report.

Tip: The report downloads to an .xlsx format used by Microsoft® Excel® so that you can easily find standards and sort the report data and possibly import the data to other applications.
7. The **Save As** dialog box appears with a default File name for the report based on your selections. You can keep the file name or change it. Click **Save**.

8. When the download is complete, open the file.

**Tip:** For schools with enabled SSO functionality, click the Associations Info symbol and enter the SSO ID (for example, johnsmith@schoolica.com) in the **SSO** field. This action creates the association for the Identity Provider (IDP) with SSO.

## Provide Odysseyware access to parents and guardians

You can provide access to the Odysseyware Parent Portal for parents and guardians. The parent or guardian receives an email with a link to the Parent Portal to set up their password and log in.

**Permission(s) check:** You must have the "Add Parent" permission enabled for your teacher profile to add and manage parents. See your Odysseyware Administrator if you require the permission enabled for your teacher profile.

Before you create the parent profile, you need:

- At least one student associated with it. If you have not added the student(s) to Odysseyware, see "**Add (register) students**" on page 7.
- The parent's valid email address. Their email address becomes their Odysseyware username.

1. On the main nav bar, click **Parents**.
2. Click the **Create Parent Profile** tab.
   a. Enter the **First Name** and **Last Name** of the parent or guardian.
   b. In the **Login ID** field, enter a valid email address of the parent or guardian. This email address is their Odysseyware username.
   c. In the **Add Student** field, start typing the name of the student associated with the parent or guardian. As you begin typing, a filtered list appears. Select the name of the student to associate with this parent or guardian.
   d. Click **Add**.
   e. Repeat steps c and d to associate additional students.
   f. Click **Save**.
3. Verify the information you added and click **Send Confirmation**. Click **OK**.

The email contains a link which remains active for 36 hours. If the parents do not open, read and create their password, you will need to resend the confirmation.

## View, manage, and search courses

Odysseyware supports our standard courses as well as any custom courses you may want to develop.

- **Standard courses** are the default courses provided when you purchase Odysseyware. You cannot modify the Odysseyware standard courses.
- **Custom courses** are those you create either by searching for and combining units and assignments from existing standard courses or by searching for and combining your custom assignments with assignments from standard Odysseyware.
Communicate with teachers and students using internal messaging

Odysseyware has an internal messaging system that allows teachers and admins to receive messages from other teachers, admins, and students, and send messages to other teachers, admins, students, and student groups. Teachers and admins also receive internal system support messages that let them know if an enrollment may soon be archived or other important system notifications. Teachers and admins can also export help-requested and person-to-person messages as PDFs to provide the message details to others. Students can send messages to their teachers, even while working on an assignment, and receive messages from their teachers.

To read, reply to, and send an internal message:

1. On the main nav bar, click Messages.

   By default, the Messages tab displays All messages (unread and read) in your Inbox in chronological order by date and time when received. Unread messages appear in bold text and read messages are in normal text.
2. To read a message, under Actions, click the View message tool. Depending on the type of message, you may be able to forward, reply to or export the message.

3. To write and send a message, click New Message.

4. To select the recipients for the message, do the following:
   a. From the Contacts list, select a type of contact to filter the list. Depending on your user role, the types of contacts you can select from may include All Students, My Students, Admins, Teachers, All Groups, and My Groups.
   b. If you selected either All Groups or My Groups, from the Groups list, select a group.
   c. Click the check box for the contact(s). By default, if you selected a group, all of the group members appear as selected on the Group Members tab and their names are automatically placed in the To field of the message. To remove a group member from the recipient's list, clear the check box.

   **Tip:** You can enter the first few characters of a user's name in the blank text field to filter the appropriate list.

5. Enter the subject of the message, and then type the message.

6. Click Send Message.

**Export messages as pdfs**

1. To export a person-to-person or help-requested message as a PDF, on the Messages tab, under Actions, click the Export tool. Or, if you already have the message open, click the Export button.

   The message downloads as a PDF. Depending on your browser, the file may show on a tab at the bottom of the page.

2. Click to open the file, or just attach the pdf file to any email in an external messaging program.
