

IT Students Earn Cash, Prizes, Jobs

Congratulations to Mrs. Foxhall's Web students who took 1st and 2nd places for the Congressional App Challenge. Congressman Matt Gaetz presented over \$700 in cash prizes and certificates to the students. In addition, the students who won first place were offered part-time jobs at local coding companies. The first place winners' app will also be shown in the Capitol. The winners will also have the opportunity to go to Washington, D.C. and participate in a Congressional App Challenge reception.

1st place winners Joshua Delamater, Sam Cota, and Ethan Shelstad created a "Volunteer App" to help students track their community service hours. It helps students find volunteering opportunities in the local area through google maps and encourages volunteering among the community. It also calculates students hours earned so they may keep track for college scholarship purposes. Here is the link: https://drive.google.com/file/d/18T_qw0_Vb0Eji4aXg47x3CD9ErRXALUJ/view?ts=5bc0d34b

2nd place winners Collin Padgett, Maguire Holahan, Abbie Stanford, Austin Mason created a "Dear Senses-Reflex App." It was created for elderly/disabled people or even medical personal to help people determine if they have problems with hearing, sight, or reflex times before seeking medical help.
